In Clause 521.10.202, new requirements for wiring systems expands on the regulations which previously only applied to escape routes. Under the 18th Edition, all cable support systems must be constructed from appropriate materials that will protect against premature collapse, typically caused by exposed heat during a fire.

For more than 30 years, students and practising electricians have relied on John Whitfield to guide them through the complexities of the Wiring Regulations. Unlike other publications, it

does not assume that readers are fully conversant with electrical theory. It assumes just a basic knowledge and introduces technical matter with brief easy-to-understand explanations. His Guide is a recognised brand, has consistently been a bestseller and regarded as THE guide to the Wiring Regulations. This 4th Edition covers Amendment 3:2015, regarded as ‘ potentially life-saving ’, which comes into effect July 2015. As in earlier editions, all useful relevant details derived from other IET publications such as Guidance Notes, Wiring Matters, which might otherwise be overlooked by electricians, are included. Importantly the Guide also benefits from the most up-to-date, hands-on expertise provided by the co-author, Andrew Hay-Ellis, whose credentials are second-to-none. He is an established author of vocational electrical books and, amongst other functions, is a Chief Examiner at City & Guilds.

Following publication of the new version of The 16th Edition IEE Wiring Regulations in 2001 (BS7671: 2001), The IEE On-site Guide has also now been revised. The guide is a practical guide to the Wiring Regulations and is the adopted text for many college and training courses for electricians / electrical installation.

The IET Wiring Regulations are of interest to all those concerned with the design, installation and maintenance of electric wiring in buildings. The market includes electricians, electrical contractors, consultants, local authorities, surveyors and architects. This book will also be of interest to professional engineers, as well as students at university and further education colleges.
