the purpose of certifying concrete technicians who have demonstrated the knowledge and ability to properly perform the basic field tests on freshly mixed concrete. The increasing demand for certification by many governmental agencies has made it desirable for ACI to accept leadership in creating and maintaining a certification program to improve the accuracy and reliability of the field testing of freshly mixed concrete. In addition to upgrading the quality of concrete construction, this program is intended to prepare the industry for the possibility of future mandatory certification, and to form the basis for higher level certification programs. Technicians who upgrade their skills and credentials through ACI certification will increase their own opportunities as well as contribute to the advancement of the industry. This Technician Workbook (CP-1) describes the operation of the ACI Certification Program and provides technical materials and directions necessary to prepare for the examinations.--iii.

This standard defines the qualification requirements to qualify welding inspectors. The qualification requirements for visual welding inspectors include experience, satisfactory completion of an examination which includes demonstrated capabilities, and proof of visual acuity. The examination tests the inspector's knowledge of welding processes, welding procedures, nondestructive examinations, destructive tests, terms, definitions, symbols, reports, welding metallurgy, related mathematics, safety, quality assurance and responsibilities.
