ATI Skin and Wound Care is a major health care concern that affects many individuals with different types of wounds and consumes vast resources. The nurse observes a yellowish-tan, soft, stringy area of necrotic tissue formed in clumps and adhering firmly to the wound bed. An acute wound is caused by trauma from a sharp object.

Surrounding wound edges can become macerated because of the moisture contained in the dressing, and that can lead to enlargement of the wound's diameter. Cross-contamination is also an issue as the saturated gauze in wet-to-dry dressings does not provide any barrier to the environment, thus allowing organisms in and out of the wound easily.
