This book investigates how community arts, environmental creativity, and the changing role of artists in the Polis contribute to the goal of a sustainable future from a number of interdisciplinary perspectives. From considering the role that art works play in revealing local environmental problems such as

conscious development. Utilising a broad range of case studies and analysis from a body of work collected through the international environmental COAL prize, this book examines the evolution of the relationship between culture and the environment. This book will be of interest to practitioners of the environmental arts,

and with a view to the interdisciplinary knowledge, capable of integration, of related disciplines. With a profound insight into the operative processes, the author analyses the complex mechanisms of the system that affect the whole of society and often follow very traditional process structures. He investigates the

Has a new political ideology emerged in the aftermath of the Sixties? Gayil Talshir examines the ideological evolution of green parties in Britain and Germany and traces the formation and transformations of a new type of ideology - a modular ideology. In the 1980s, the 'extraordinary

Joseph Beuys is one of the most important and controversial German artists of the late twentieth century, an artist whose persona and art is so tightly interwoven with Germany's fascist past—Beuys was, after all, a former soldier in the Third Reich—that he has been a problematic figure for postwar and post-reunification

Germany. In illuminating the centrality of trauma and the sustained investigation of the notion of art as the two defining threads in Beuys's life and art, this book offers a critical biography that deepens our understanding of his many works and their contribution. Claudia Mesch analyzes the aspects of Beuys's works that have most

offended audiences, especially the self-woven legend of redemption that many have felt was a dubious and inappropriate fantasy for a former Nazi soldier to engage. As she argues, however, Beuys's self-mythology confronted post-traumatic life head on, foregrounding a struggle for psychic recovery. Following Beuys's

exhibitions in the 1970s, she traces how he both expanded the art world beyond the established regional centers and paved the way for future artists interested in activism-as-art. Exploring Beuys's expansive conceptions of what art is and following him into the realms of science, politics, and spirituality, Mesch ultimately

demonstrates the ways that his own myth-making acted as a positive force in the Germany's postwar reckoning with its past.

The book discusses how culture

simultaneously shapes and is shaped by the economy. Over the past few years, as the world has staggered from one financial crisis to another, the neat separation of economics and culture has been consistently challenged. To understand the current state of affairs, it has become increasingly necessary to understand the

conjuncture that rules the production of value in economic systems, how money shapes social relations and affects discursive practices. By discussing the vocabulary, by understanding the rhetoric and interpreting the narratives, be it of crisis, austerity, growth, welfare, neo-liberalism or socialism, new modes of

The book is structured in four chapters dealing with theory and conjuncture (‘‘Philosophies of Money’’), with the visual arts and investment (‘‘The Arts and Finance’’), with literary representation and narrativity (‘‘Literature and Money Matters’’ and with the
