manufacturing industries. These companies have also

encountered major challenges in their businesses or

Cusumano distills six

enduring principles

that he believes have

been - in various

combinations - crucial

to their strategy,

innovation

management practices, and ability to deal with change and uncertainty. The

Agreement

first two principles -

platforms (not just

products), and

services (especially

for product firms) - are

relatively new and

broader ways of

thinking about

strategy and business

models, based on

Cusumano's latest

research. The other four - capabilities (not just strategy or positioning), the "pull" concept (not just push), economies of scope (not just scale), and flexibility (not just efficiency) - all contribute to agility, which is a mix of flexibility and speed.

Many practices

Associated with these ideas, such as dynamic capabilities, just-in-time production, iterative or prototype-driven product development, flexible design and manufacturing, modular architectures, and component reuse, are now commonly regarded as standard best
