The On Cooking: A Textbook of Culinary Fundamentals, 5th Edition is a good textbook. It provides step-by-step instructions on how to make quality restaurant level food. I purchased the hardcover and it is a very heavy book. The book arrived on time and was in new condition. The pictures are awesome and the information is helpful.

Wherever one's career in the culinary arts may take them, this book will remain a valuable reference. It can support readers throughout their culinary education and certification, as well as throughout their professional career. This book presents a foundation — from the objectives and key terms that introduce each chapter to the activities and recipes that round it out, this book is organized to highlight and explain the basic competencies of a professional cook or chef. Section One takes a moment to look back at the importance of the culinary arts in the history of humankind as well as a glimpse ahead into the careers of culinary professionals. Section Two introduces important concepts for any professional cook or chef: nutrition, food safety, and food science. Section Three continues the development of some basic professional skills by exploring the purpose and uses for math and recipes in the professional kitchen. Section Four introduces the tools of the trade. Section Five is devoted to the ingredients found in a professional kitchen, from fresh herbs to meats to canned goods. Sections Six through Twelve are the heart of this book—basic cooking skills—stocks, sauces, sautés, roast, vegetables, starches, breakfast, baking and more. Also presents a broad view of the culinary globe by grouping it into large geographic areas: Europe and the Mediterranean; the Americas; and Asia. Appropriate for cooks, culinary apprentices, culinary trainees, chefs, and chef educators.

The Bar and Beverage Book explains how to manage the beverage option of a restaurant, bar, hotel, country club—any place that serves beverages to customers. It provides readers with the history of the beverage industry and appreciation of wine, beer, and spirits; information on equipping, staffing, managing, and marketing a bar; and the purchase and mixology of beverages. New topics in this edition include changes to regulations regarding the service

of alcohol, updated sanitation guidelines, updates to labor laws and the employment of staff, and how to make your operation more profitable. New trends in spirits, wine, and beer are also covered.

The fourth edition of this classic text continues to use a multidisciplinary approach to expose the non-major food science student to the physical and chemical composition of foods. Additionally, food preparation and processing, food safety, food chemistry, and food technology applications are discussed in this single source of information. The book begins with an Introduction to Food Components, Quality and Water. Next, it addresses Carbohydrates in Food, Starches, Pectins and Gums. Grains: Cereals, Flour, Rice and Pasta, and Vegetables and Fruits follow. Proteins in Food, Meat, Poultry, Fish, and Dry Beans; Eggs and Egg Products, Milk and Milk Products as well as Fats and Oil Products, Food Emulsions and Foams are covered. Next, Sugar, Sweeteners, and Confections and a chapter on Baked Products Batters and Dough is presented. A new section entitled Aspects of Food Processing covers information on Food Preservation, Food Additives, and Food Packaging. Food Safety and Government Regulation of the Food Supply and Labeling are also discussed in this text. As appropriate, each chapter discusses the nutritive value and safety issues of the highlighted commodity. The USDA My Plate is utilized throughout the chapters. A Conclusion, Glossary and further References as well as Bibliography are included in each chapter. Appendices at the end of the book include a variety of current topics such as Biotechnology, Functional Foods, Nutraceuticals, Phytochemicals, Medical Foods, USDA Choosemyplate.gov, Food Label Health Claims, Research Chefs Association certification, Human Nutrigenomics and New Product Development.
