There are plenty of opportunities in whatever we do; band, choir, orchestra, music history, theory, composition, improv, and MIDI classes. One way to empower students to exercise their creative muscles is to get them to push beyond just one solution. For every musical problem there is more than one solution, so don ' t stop short.

Abstract. Research suggests that exploratory experiences in the music classroom are a crucial developmental stage as students begin making the kinds of decisions required of them during composition and improvisation. The aims of this article are to (1) articulate a rationale for exploratory learning experiences in the music classroom and (2) outline practical strategies for using exploration as a foundation for compositional and improvisational development.

Peter Webster ' s definition of " creativity in music " is succinct: " the engagement of the mind in the active, structured process of thinking in sound for the purpose of producing some product that is new for the creator. " Furthermore, this is a thought process and " we are challenged, as educators, to better understand how the mind works in such matters — hence the term creative thinking. " (Webster, 1987)

Creative thinking can be stimulated both by an unstructured process such as brainstorming, and by a structured process such as lateral thinking. Source: www.businessdictionary.com. Creativity is the ability to make something new. This might be a picture, or a piece of music—but it might also be a new idea. Creative thinking, therefore, is the ability to think differently: to see a problem or issue from a new angle or perspective.
