Through studying environmental systems and societies (ES&S) students will be provided with a coherent perspective of the interrelationships between environmental systems and societies; one that enables them to adopt an informed personal response to the wide range of pressing environmental issues that they will inevitably come to face. The teaching approach is such that students are allowed to evaluate the scientific, ethical and socio-political aspects of issues.

### ~~IB Environmental Systems and Societies: Answers~~ ---

An environmental value system is a system in the sense that it has inputs (for example, education, cultural influences, religious doctrine, media) and outputs (for example, decisions, perspectives, courses of action) determined by processing these inputs.

### ~~ESS Topic 1 1– Environmental Value Systems – AMAZING WORLD~~ ---

Environmental Systems and Societies (ESS) is a college-level introduction to ecology, which overlaps significantly with the IB Geography syllabus. It is science applied to ideas presented in geography, economics, and TOK.

### ~~IB ESS | MrKremerScience.com~~

IA Overview. The most important aspect of the environmental systems and societies course is hands-on work in the laboratory and/or out in the field. The syllabus not only directly requires the use of field techniques, but many components can only be covered effectively through this approach. Practical work in this subject is an opportunity to gain and develop skills and techniques beyond the requirements of the assessment model and should be fully integrated with the teaching of the course.

### ~~Environmental Systems And Societies Asse | Mysite~~

Environmental Systems and Societies (ESS) ESS is offered only at standard level (SL). As an interdisciplinary course, ESS can count as either a Group 3 or a Group 4 course.

Environmental Systems and Societies is the study of environmental issues and their impact on today's society. We study topical subjects, such as: global warming, energy security, conservation of biodiversity, pollution management, agricultural systems, sustainability and carrying capacity.

### ~~Environmental Systems and Societies (ESS) – Oakham School~~

Although the ESS course requires the study of environmental systems and societies at a range of scales, from local to global, the teaching of the course should be firmly grounded in the local environment. The syllabus contains many references to "local examples", and fieldwork may be based on local ecosystems.
