Pirlo's profile could not be much higher, having competed in the Champions League final in May 2015 and then embarking on a new career signing with MLS side New York City FC in July 2015. The vibrancy, humor and vivid insight that carry Pirlo's autobiography along confounds his image as a dead-eyed assassin on the field of play. All the big names are in there: Lippi, Ancelotti, Conte, Maldini, Shevchenko, Seedorf, Buffon, Kaka, Nesta, Costacurta, Gattuso, Berlusconi and Ronaldo ("the real one"). But they're not

We see Pirlo and Daniele De Rossi drawing Nesta's ire as they take him on a mystery tour of the German countryside in a hire car days before a World Cup semi-final. And we smell the aftermath of Filippo Inzaghi's graphically described pre-match routine.

ruin. Whether or not good for the body, Scruton argues, wine, drunk in the right frame of mind, is definitely good for the soul. And there is no better accompaniment to wine than philosophy. By thinking with wine, you can learn not only to drink in thoughts but to think in draughts. This good-humoured book offers an antidote to the pretentious clap-trap that is written about wine today and a profound apology for the drink on which civilisation has been founded. In vino veritas.

psychological, with the emphasis on the psycho," wrote Howard Rankin in his book *Power Talk; The Art of Effective Communication*. In *I Think Therefore I Am Wrong*, Dr Rankin explores the various processes of thinking and shows how for the most part, we are not logical but rationalizers, story-tellers interested in consistency and emotional comfort than the truth. The book takes us through the latest information in cognitive neuroscience, told with Rankin's uncanny knack of making scientific ideas easy to grasp and wrapping the details in humor. cognitive neuroscience could be that funny! The overall message also has some dark undertones as Rankin shows how and why, the conventional and social media have major influences on thoughts and beliefs and how that impacts us in the present and the future of civilization. Rankin explores traditional concepts of defense mechanisms and relates them to the many cognitive biases that have been identified, as we march to an ever more narcissistic view of 'reality'. These biases effect every aspect of life and Rankin explores how they influence key institutions like healthcare, the law, education as well
