Africa 's regional aviation markets generally lack good airports and air traffic control, viable airlines, and adequately skilled labour. Airline safety is also a major concern. Written by a ' Who ' s Who ' of aviation specialists and policy makers, The Economics and Political Economy of African Air Transport

fills an emerging void in the literature regarding Africa ' s aviation markets. Its original papers focus explicitly on the economic and political dimensions of the subject, although with relevance to the strategic planning and management of airlines and their associated infrastructure. Topics discussed include
