Knowing What Students Know:

The Science and Design of ...

Knowing What Students Know essentially explains how expanding knowledge in the scientific fields of human learning and educational measurement can form the foundations of an improved approach to assessment. These advances suggest ways that the targets of assessment-what students know and how well they know it-as well as the methods used to make inferences about student learning can be made more valid and instructionally useful.

students also need to know what they are aiming for. Success criteria, whether it is in the form of a target grade or exemplar, needs to be shared with and understood by pupils; like many others, our department puts target stickers in students' books, so there is no excuse for not knowing your target.

How do you know your students are learning?

Knowing our students is fundamental to real differentiation. Several of the ideas that follow are shared in my book (see footer below). I've offered six different ideas for getting to know our students, one for each of the first six weeks of school, but once you get past the
