Practice 35

Three chords in the figure are 3.

A line in the plane of $\triangle ABC$ and perpendicular to BC at P is a

line through P inscribed in $\triangle ABC$. If points E , F , and G lie on AB , BC , and CA respectively, such that $AE = BF = CG$, then $\triangle EFG$ is an equilateral triangle.

5. In $\triangle ABC$, $\angle A = 90^\circ$. D is a point on BC such that $AD \perp BC$. E is a point on AB such that $AE = AD$. F is a point on AC such that $AF = AD$. G is a point on BC such that $AG \perp EF$. H is a point on BC such that $AH \perp BC$. I is a point on BC such that $AI \perp EF$. J is a point on BC such that $AJ \perp BC$. K is a point on BC such that $AK \perp EF$. L is a point on BC such that $AL \perp BC$. M is a point on BC such that $AM \perp EF$. N is a point on BC such that $AN \perp BC$. O is a point on BC such that $AO \perp EF$. P is a point on BC such that $AP \perp BC$. Q is a point on BC such that $AQ \perp EF$. R is a point on BC such that $AR \perp BC$. S is a point on BC such that $AS \perp EF$. T is a point on BC such that $AT \perp BC$. U is a point on BC such that $AU \perp EF$. V is a point on BC such that $AV \perp BC$. W is a point on BC such that $AW \perp EF$. X is a point on BC such that $AX \perp BC$. Y is a point on BC such that $AY \perp EF$. Z is a point on BC such that $AZ \perp BC$.

6. In $\triangle ABC$, $\angle A = 90^\circ$. D is a point on BC such that $AD \perp BC$. E is a point on AB such that $AE = AD$. F is a point on AC such that $AF = AD$. G is a point on BC such that $AG \perp EF$. H is a point on BC such that $AH \perp BC$. I is a point on BC such that $AI \perp EF$. J is a point on BC such that $AJ \perp BC$. K is a point on BC such that $AK \perp EF$. L is a point on BC such that $AL \perp BC$. M is a point on BC such that $AM \perp EF$. N is a point on BC such that $AN \perp BC$. O is a point on BC such that $AO \perp EF$. P is a point on BC such that $AP \perp BC$. Q is a point on BC such that $AQ \perp EF$. R is a point on BC such that $AR \perp BC$. S is a point on BC such that $AS \perp EF$. T is a point on BC such that $AT \perp BC$. U is a point on BC such that $AU \perp EF$. V is a point on BC such that $AV \perp BC$. W is a point on BC such that $AW \perp EF$. X is a point on BC such that $AX \perp BC$. Y is a point on BC such that $AY \perp EF$. Z is a point on BC such that $AZ \perp BC$.
