MUSEUM Rolls Royce Silver  
Cloud Ii

The Rolls-Royce Silver Cloud is a luxury automobile produced by Rolls-Royce Limited from April 1955 to March 1966. It was the core model of the Rolls-Royce range during that period. The Silver Cloud replaced the Silver Dawn and was, in turn, replaced by the Silver Shadow. The J. P. Blatchley design was a major change from the pre-war models and the highly derivative Silver Dawn. As part of a range rationalisation the Bentley S1 is very similar, apart from its radiator grille.

When in 1959 Rolls-Royce  
introduced the Silver Cloud  
II, it came with the brand  
new V8 aluminum engine.

Although the standard steel  
body was very conservative,  
it was still elegant and  
Rolls-Royce had yet again  
made it to the top of the  
class. Based on this model  
beautiful classics were  
created with ...

Trader

The Silver Cloud II was introduced in 1959 with a few changes: visually almost unchanged but with a brand new V8 aluminum engine. With a capacity of 6,230 ccm the model came with an enormous torque. In typical understated fashion, Rolls-Royce called its 200 PS performance "sufficient".
