Ancient cheesemaking. One of the ancient cheesemakers' earliest tools for cheesemaking, cheese molds or strainers, can be found throughout Europe, dating back to the Bronze Age. Baskets were used to separate the cheese curds, but as technology advanced, these cheese molds would be made of wood or pottery.

~~Cheesemaking - Wikipedia~~

Cheese manufacture using membrane processing has been practiced commercially since the early 1970s but the manner in which it is used has evolved over time owing to experience gained by cheese-makers and the development of new membranes and applications. Membrane processes can be used in cheese manufacture to accomplish various specific tasks.
