Data Testing Methods. Many companies currently perform data testing, data validation and reconciliation, knowing their importance. The problem is that for all of the advances made in the software space in big data, data warehouses and databases, the process of data testing is still a manual one that is loaded with risk and ripe for producing massive amounts of bad data.

The 3 Biggest Issues with Data Warehouse Testing. The #1 Method to compare data from sources and target data warehouse – Sampling, also known as " Stare and Compare " — is an attempt to verify data dumped into Excel spreadsheets by viewing or " eyeballing " the data. Less than 10% is usually verified and reporting is manual. The #2 Method – MINUS queries – subtracts data sets ...

All Payer Database Background. New York State enacted legislation in 2011 that allowed for the creation of an All Payer Database (APD). The complexities of the health care system and the lack of comparative information about how services are accessed, provided, and paid for were the driving force behind this legislation.
