Globalization is creating fresh opportunities for hundreds of millions of people. But the gap between richest and poorest countries is widening and inequality within many countries is increasing. CGD president Nancy Birdsall will testify this week before a U.S. congressional committee on policies for fair growth in Latin America, where inequality, long a problem, is getting

[Globalization and Inequality | Center For Global Development](#)

Global inequality (the relative inequality of incomes among all peoples in the world) raised from 1820 to about 1990. This increase was driven by different growth processes among countries. Inequality within countries was stagnant or falling over much of this period, most notably over the middle half of the twentieth century.

[Is globalization causing inequality? - Mapping Ignorance](#)

Globalization and Inequality A fundamental challenge posed by the increasing reach of global markets (â€globalization') is that global markets are inherently dis-equalizing, making rising inequality in developing countries more rather than less likely.

[Globalization Will Increase Inequality](#)

Globalization and inequality This chapter examines the relationship between the rapid pace of trade and financial globalization and the rise in income inequality observed in most countries over the past two decades. The analysis finds that technological progress has had a greater impact than globalization on inequality within countries.

[Globalization and inequality - International Monetary Fund](#)

There are various causes of global improvisation and social inequality and some of these causes are: high rate of unemployment, structural adjustments, overpopulation, colonialism, foreign trade and investments, cheap labor and low consumer spending power.
